

MILLENNIUM ULTRA

FLEXIBLE

CUSTOMIZABLE

RELIABLE

Full featured Access Control software

Millennium Ultra combines a modern, intuitive user interface with a highly capable architecture providing the features and reliability that enterprise customers demand. Experience the same ease of use you've come to expect from Millennium, totally rewritten as a scalable, flexible and highly extensible state of the art Access Control Platform.

Ultra is easily scalable, allowing for simple migrations from small Entry systems and large Enterprise systems. A multi-window user Interface provides a single view for the event monitor, alarm monitor, and image verification- Puts more power in your access control system. For new installations, Ultra scales to meet the application needs, making it an affordable solution, no matter the system requirements.

More Flexibility

Reliable proven software with modularity for flexible solutions

Multiple simultaneous operators

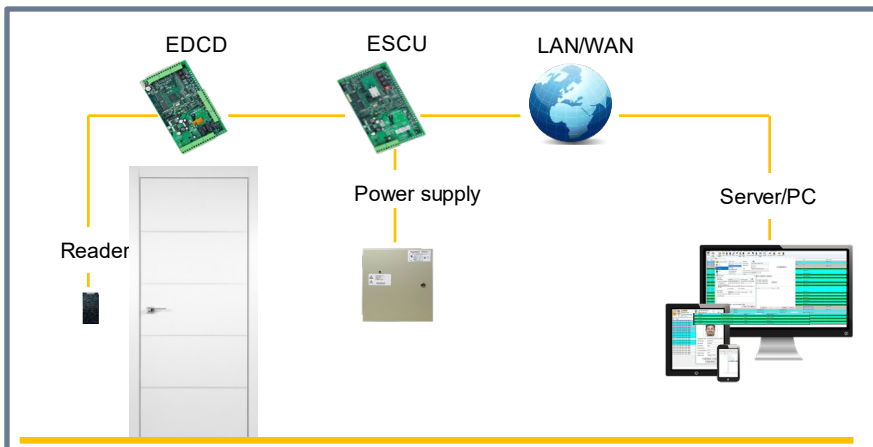

Extensive features

Full software features available with Millennium Plexus wireless controllers

Easily scalable

Enterprise-class software that supports thousands of doors

Millennium Ultra system topology
