

Unleashing the Power of Data: Discover the Potential of Our "Reports" Feature

JULY 6, 2023

Millennium's Reports feature serves as an indispensable element within our access control system, revealing valuable insights into security events, access patterns, and system performance. By customizing your reports to suit your specific needs, you unlock important information that empowers you to identify patterns, detect anomalies, and effortlessly track occupancy trends.

With this knowledge at your fingertips, you hold the power to proactively address security risks and optimize your operations. Millennium's Reports feature equips you with data-driven decision-making capabilities, ensuring the highest level of security and efficiency for your organization. Explore the possibilities and unleash the full potential of your access control system with Millennium's Reports feature.

Event Reports: quick and efficient reports based on system events by date and time, you can search to the minute:

Features

Card holder reports provide a comprehensive list of options for searchers.

- Card Holders
- Card holder access
- Card with overlapping access levels
- Inactive users
- Imported Cardholders
- Reports by access group or access point
