Why Choose 2N IP Intercom Integration?

2N IP Integration represents a powerful solution for access control and intercom telephony, delivering convenience, security, and customization options to meet your facility's unique needs.

- Intuitive touchscreen interface, making access management straightforward and efficient.
- With modularity and remote configuration capabilities, you can tailor the system to meet your specific facility requirements.
- Event history logs provide transparency into intercom events, offering a comprehensive view of calls and door openings.

Beyond CLOUD ACCESS, We Grant CONFIDENCE

Millennium **Ultra** seamlessly integrates with the 2N® IP Verso Intercom system, offering a seamless blend of access control and intercom telephony. This integration not only enhances access control reliability but also simplifies interfacing with Millennium Ultra, resulting in elevated site security and user convenience through a modern intercom system. Our software introduces the capability to save and search intercom events, complemented by the user-friendly Ultra Mobile Connect application for remote and on-site door control. Additionally, with video and audio connectivity directly to your phone, this enables the combination of an intercom solution with Millennium's technology, delivering a top-tier access control solution tailored to your needs.

Pairs Well With Our Elevator Mod

Millennium's Elevator Management Mod enhances safety and security in residential apartments, hospitals, schools and offices. Grant specific individuals access to designated floors at predetermined times using proximity cards, key fobs, or mobile credentials. Integrated with CCTV cameras, it ensures better monitoring of elevator usage. Define access based on door control credentials, restricting unauthorized access to specific floors for improved building security and efficiency.
