Beyond CLOUD ACCESS We Grant CONFIDENCE

FEATURES

- Comprehensive security management
- Integrates with MGI's relays
- Regulatory compliance and asset protection

Why Choose Millennium & Allegion Integration?

Millennium **Ultra** integrates with Digital Monitoring Products (DMP) to provide a robust solution designed to address the challenges of today's security environments.

- Set up the access control system to take the proper actions when or if an alarm goes off at the DMP alarm, all through the Millennium Ultra software.
- Combines the flexibility, scalability, and control necessary for comprehensive security management.
- Harnesses the power of DMP's fire detection system, alongside Millennium's access control, to provide organizations with a versatile and effective security system.
- Operates effortlessly with readers connected to the Millennium Ultra software, offering both fire zone capabilities and traditional card reader and keypad functionalities.
