- Anonymous tips submissions
- Works great with our CCTV solution, UltraCloud

## Why Choose Millennium & Rave Integration?

Millennium **Ultra** integrates with the Rave Alert mobile safety system, offering a comprehensive mass notification solution that ensures the right message reaches the right user at the right time, accessible from any internet-connected device. This integration acts as a gateway for event alarms within the Millennium access control system to be efficiently relayed to the designated recipients through Rave notifications. Moreover, Millennium Ultra provides ongoing support for Rave Alert's automated data management, ensuring data remains fresh and up-to-date. Rave Alert is a user-friendly, robust emergency notification platform trusted by governments, organizations, institutions, and schools for quick and reliable message dissemination, including desktop notifications, in just three clicks.

- Unify the collaboration and communication experience under one umbrella.
- Present your crisis management service in one user-friendly platform.
