

Convenient

Simplify access control with convenient features that streamline user management

Customization

Millennium offers extensive customization to tailor access control settings and permissions to your needs

Cloud

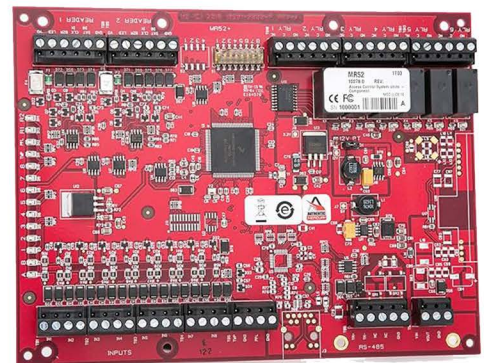

Supports cloud-based storage and management for flexible access

Scalable Solutions

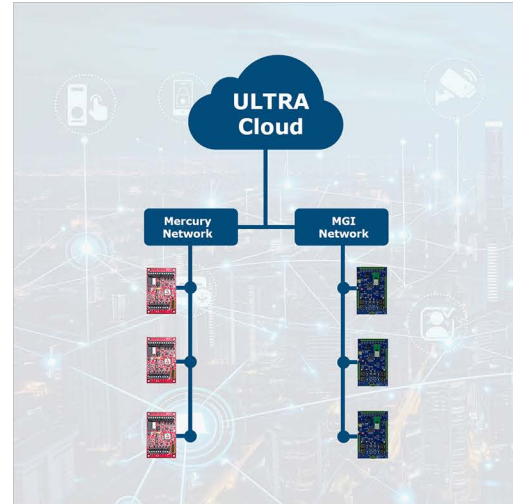

Effortless Upgrade to Cloud-Based Access Control

Transitioning from on-premises Mercury systems to our advanced cloud platform enables seamless, remote management of access control. As your site grows, you can expand with Millennium's robust hardware. The Millennium solution allows a site to operate both MGI and Mercury hardware on a single database

Empower your clients with Millennium Access by upgrading their legacy Mercury control panels to the cloud without the hassle of costly and time-consuming hardware overhauls. Our software allows you to leverage existing access control infrastructure, while the site can expand with Millennium hardware. This upgrade enhances security and enriches the user experience with intuitive, cloud-enabled management. With Millennium, you can keep your clients' systems adaptable and future-ready, thanks to our support for open architecture hardware. **Additionally, we support both Mercury and Millennium hardware at the same location, ensuring maximum flexibility and convenience for your clients.**

FEATURES

- ▶ Utilize existing hardware to minimize expenses
- ▶ Easily expand your system with additional panels and power supplies
- ▶ Interoperable Hardware
- ▶ Open architecture allows for easy upgrades and expansions
- ▶ Fast panel conversions with the Millennium Mercury Provisioning Tool
- ▶ User-Friendly Interface
- ▶ Manage and monitor access control from anywhere with internet access
- ▶ Trusted by global manufacturers and system providers
- ▶ Real-Time Monitoring
